

RATCHET TOOL INSTRUCTIONS

1 Place the Tensioner about 30cm away from the buckle. Open the Gripper Foot of the Tensioner by pressing the handle down. Position the Narrostrap under the strap cutter, drum and foot. Release the Tensioner handle so that the foot grips down onto the Narrostrap.

2 Now thread the cut end of the Narrostrap through the cutter and the drum.

3 Tension your Narrostrap by ratcheting the handle forward and backwards. The Narrostrap is fully tensioned when the top leg of the buckle clamps down and makes contact with the bottom of the buckle.

4 Push the handle of the Tensioner firmly down so that the Narrostrap tail is cut and the foot releases. Keeping the handle down, remove the Tensioner from the Narrostrap by moving the Tensioner sideways.
